

RESEARCH ASSISTANT / PHD CANDIDATE POSITION OPENING

Applications are invited for :

One Research Assistant position (PhD candidate) in lifespan development (80%, up to 6 years), with flexible start date between February and June 2023

The successful applicant will study development in different domains including cognition, health, and well-being across the lifespan, as well as assist Prof. Andreas Ihle in tasks related to research, lab management, and teaching.

We offer:

- Work in a friendly, open, and supportive international research team
- Mentoring and support for pursuing a research career
- Excellent lab infrastructure
- Opportunity to collaborate with other labs (Switzerland and abroad)
- Opportunity to participate in large-scale international collaborations
- Salary according to local regulations (class 8 in official State of Geneva salary table; ~53000 CHF per year)

Desired profile:

- Master in psychology or a related discipline (applicants with masters defense planned in 2022 or early 2023 can also apply)
- Very good skills in applying quantitative methods, namely longitudinal data analyses and in handling large datasets
- Background in cognitive psychology, developmental psychology, clinical or health psychology, and/or interdisciplinary lifespan research
- Solid programming skills (particularly R)
- Interest in pursuing an academic career
- Very good command of English (written and oral)
- Fluency in French will be considered an advantage. A basic level of French is needed, as well the willingness to reach the desired level in a few months after starting the position (to interact with students and participants)
- Experience with experimental research in humans is favorable
- Willingness to supervise masters students
- Willingness to assist with teaching and administrative tasks
- Willingness to travel (for conferences and/or international collaborations)
- Willingness to collaborate with other research groups

**UNIVERSITÉ
